

RED HAT LEARNING SUBSCRIPTION

One year of access to all Red Hat Training online courses

DATASHEET

YOU WILL RECEIVE :

- Unlimited access to 30 online courses.
- 400 hours of cloud delivered, hands-on lab time.
- More than 300 recorded instructor videos.
- Access to new and updated courses as they become available during your year-long access.

PROGRAM OVERVIEW

Red Hat® Learning Subscription is an exclusive program that provides you with one year's access to all Red Hat Online Learning courses. You will receive unlimited access to our online learning content, up to 400 hours of hands-on lab time, and more than 300 recorded instructor videos – all for one low price.

Learn about core Red Hat technologies such as Red Hat Enterprise Linux® and Red Hat JBoss® Middleware. Explore emerging technologies such as Red Hat Enterprise Linux OpenStack® Platform and OpenShift Enterprise by Red Hat. Or prepare for your Red Hat Certified System Administrator (RHCSA), Red Hat Certified Engineer (RHCE®), or other certifications.

This program allows you to take any of these courses in your own time and at your own pace, so if you are considering taking more than one Red Hat course within the next year, this program may be the best way to get the training you want, when you need it.

If you're a manager looking to improve the skills of your team, Red Hat Learning Subscription is the perfect solution for the frustrations of traditional training, saving you time, energy, and budget. Through this offering, your team has access to the latest courses without the need to leave the data-center. This gives the flexibility to train when needed, with just-in-time access for job-role performance support, and the ability to train in small, targeted chunks when time allows. An additional bonus is that, with Red Hat Learning Subscription, you can now budget for all training, all on one purchase order.

ABOUT RED HAT ONLINE LEARNING

Red Hat Online Learning courses feature the same high-quality course content found in our traditional classrooms, supplemented with ground-breaking, cloud-based labs. Some online learning courses also include dozens of recorded webinars by senior instructors.
